

MMP Fire and Security **Company Profile**

MMP Fire and Security is a North-West based company specialising in the design, installation and maintenance of Intruder Alarm, Fire Alarm, Remote Monitoring, CCTV, and Access Control systems.

MMP Fire and Security's industry-trained staff are all former Initial Shorrock/Chubb employees with more than 50 years' combined experience of designing, installing, monitoring and maintaining the latest electronic security solutions to stringent insurance and industry certification standards.

Now we've formed a completely local company offering exceptional customer service when dealing with all your installation, service and billing preferences so that, between us, we can establish a long-lasting working relationship everyone's happy with.

We offer the latest, cutting-edge products incorporating wireless technology, fully digitised and PC based high-resolution CCTV surveillance, as well as bespoke access systems individually tailored to the specific demands of your company or domestic premises.

All our systems are backed by our 24-hour support service, available 365 days a year.

“Mike and his team delivered a high level of service to help complete the Nelson Accommodation project within the timescale and the allocated budget. Systems installed included; CCTV, Access Control, Doorguard, Panic Attack, Intercom. We would definitely consider MMP for future project works.”

Paul Coogan, Contracts Manager,
Gilks Electrical Engineers, Nantwich

“We contacted MMP to discuss our CCTV requirements and, after a thorough planning stage, MMP explained the plans in a very easy to understand manner. We discussed the necessary security measures and highlighted areas of compromise. The installation ran extremely smoothly with no hassle or inconvenience and the training on the equipment and software was thorough and clear. The overall experience with MMP was of a very high standard and I would recommend them to anyone.”

Lorenzo Fardella, Financial Director,
First4 Print Finishing, Blackburn

“SafeSpace manage a supported accommodation project providing 24 hour support to vulnerable young people. We required reliable and effective door entry management and CCTV monitoring systems. The systems provided by MMP were tailored to our specific operational needs. Both systems are user friendly and very reliable. MMP's 'after installation service' has been responsive and effective.”

Paul Atkinson, Project Manager,
SafeSpace, Nelson, Lancashire

Meet the Team

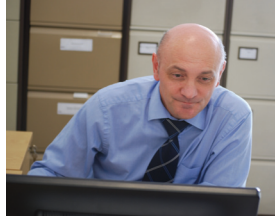

Paul Mayo
Director

Paul Mayo is an experienced security design consultant and qualified installation engineer who has experience of dealing with Key Account customers including M&E Consultants and Electrical contractors.

Paul manages key accounts, as well as being responsible for maintaining and expanding our portfolio in the Education, Health and Commercial sectors.

In his consultancy role, Paul surveys and designs bespoke, integrated Intruder, Access Control and CCTV systems for a variety of commercial and private clients.

Mike Monaco
Director

Mike also has many years' experience as a Security design Consultant and Key account manager, as well as Branch managerial experience with a blue chip company within the security industry.

Along with the development of sales, he is also responsible for the financial side of the business ensuring that there is a sensible approach to invoicing / credit control tailoring to meet our customer needs.

Gareth Penaluna
Director

Gareth is also a qualified and experienced installation engineer who oversees the commissioning of all MMP's projects ensuring they meet stringent industry standards as well as the client's specific requirements.

As Operations Manager, Gareth also programmes the contracts and monitors the provision of security engineers, supply of products and achievement of the relevant budgetary and deadline commitments.

Gareth maintains close contact with clients and the MMP staff working on their projects to make sure jobs run smoothly.

Accreditations

NSI Silver

The National Security Inspectorate is the specialist approvals and certification body that inspects companies providing home security, business security and fire safety services. Choosing an NSI approved company ensures that the contractor you select works to the highest recognised industry standards as demanded by the Police, Fire and Rescue Services and insurance industry.

As a UKAS accredited certification body, NSI approves companies providing quality solutions across the security and fire sectors including:

- electronic security systems - intruder alarms / burglar alarms, cctv, access control
- fire detection and alarm systems
- manned security / keyholding service

CHAS

Local authority health and safety and procurement professionals, with the support of the Health and Safety Executive, have developed the Contractor Health and Safety assessment scheme (CHAS). It provides information about the health and safety aspect of their application. Clients from both the public and private sectors can be assured that companies accredited by CHAS meet acceptable standards of health and safety compliance.

Constructionline

Owned and endorsed by the Department for Business, Enterprise & Regulatory Reform (formerly the DTI), Constructionline is the UK's register of pre-qualified local and national construction and construction-related contractors and consultants.

Using a Constructionline registered company means you no longer need to repeatedly fill in standard pre-qualification forms for every tender.

In terms of efficiency, time and cost saving and best practice, Constructionline is proven to deliver for public and private sector organisations alike. The service is recommended by the OGC Common Minimum Standards and The Local Government Task Force.

Unlike self-certification services, Constructionline monitors all its suppliers' details on a daily basis, saving you the hassle of chasing PQQ documents.
